

## **DR2000**

### The modular TDR level meter

### THE MODULAR TDR LEVEL METER

This device is a TDR Level Meter for measuring distance, level, volume and mass. Its modular design makes it an economical and reliable solution for common applications.

### **FEATURES**

- 2-wire loop-powered HART® TDR level meter for liquids and solids
- DPR (Dynamic Parasite Rejection): the software dynamically eliminates false reflections caused by environmental disturbances and product build-up
- Quick coupling system permits removal of the converter under process conditions and 360° rotation to make the display screen easier to read
- · Horizontal and vertical housing position to suit every installation
- The remote converter can be installed up to 100 m / 328 ft from the probe
- · Display keypad is directly accessible without opening the cover
- Measuring range up to 40 m / 131 ft
- SIL2-compliant according to IEC 61508 for safety-related systems
- Large choice of probes to cover a vast range of applications
- Aluminium or stainless steel housing

#### Industries

- Chemical market
- Oil & Gas
- Power
- Food
- Wastewater
- Pulp & Paper
- Metals, Minerals & Mining

#### **Applications - Level, Volume, and Flow**

- Liquid level measurement in process tanks for various chemical products
- · Liquid and solid volume measurement for storage tanks

# DR2000 - TDR level meter

### MODULAR DESIGN

#### **Compact / Vertical version**

- The converter is vertical. It is attached directly to the process connection (compact version).
- For installation of the device on the ground or in a recess.
- The optional LCD display is attached to the top or the side of the device.

#### **Compact / Horizontal version**

- The converter is horizontal. It is attached directly to the process connection (compact version).
- This version is ideal for installation in areas with low roof clearances.
  - For locations where it is easier to read data on the optional LCD display if the converter is in a horizontal position.

#### **Remote version**

- Users can read measurements and configure the device from the bottom of the tank.
- The remote converter can be installed up to 300 m / 984 ft away from the process connection on the tank.
- Attach the remote converter to a wall, pipe or rigid surface with the supplied wall support.

#### Weather protection

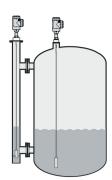

- A weather protection option can also be ordered with the device. It is recommended for outdoor applications.
- Must be ordered with the device.
- Can be ordered for both compact versions of the device and the probe housing of the remote version.
- Easily opened and closed.

## DR2000 - TDR level meter

### **APPLICATIONS**

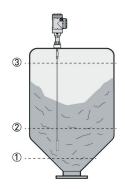

#### **1. Level measurement of liquids**

The level meter can measure the level of a wide range of liquid products on a large variety of installations within the stated pressure and temperature range. It does not require any calibration: it is only necessary to adapt the probe length and do a short configuration procedure.

#### 2. Level measurement of solids

The level meter has a  $Ø4 \text{ mm} / 0.15^{\circ}$  single cable probe for measuring powders and granulates in silos up to 20 m / 65.6 ft high. It does not require any calibration: it is only necessary to adapt the probe length and do a short configuration procedure.

#### 3. Volume measurement

A strapping table function is available in the configuration menu for volume measurement. Up to

30 volume values can be related to level values. For example:

Level 1= 2 m / Volume 1= e.g. 0.7 m<sup>3</sup>

Level 2= 10 m / Volume 2= e.g. 5 m<sup>3</sup>

Level 3= 20 m / Volume 3= e.g. 17 m<sup>3</sup>

This data permits the device to calculate volumes between strapping table entries.

standard
optional
on request

- 1 Install the device in a stilling well or a bypass chamber
- 2 Make a selection from one of these 2 options: a probe made of Hastelloy® C-22 or a probe with a PVC, PVDF or PP protective sheath
- 3 Use a probe made of Hastelloy® C-22
- 4 Use this probe with an anchor fitting. For more data, refer to the handbook.
- 5 Max. length is 20 m / 65.5 ft, more on request

### **SPECIFICATIONS**

- The following data is provided for general applications. If you require data that is more relevant to your specific application, please contact us or your local sales office.
- Additional information (certificates, special tools, software,...) and complete product documentation can be downloaded free of charge from our website.

Converter	
Measuring system	
Application	Level and volume measurement of liquids, pastes, powders and granulates
Measuring principle	
Construction	Compact version: Measuring probe attached directly to a signal converter Remote version: Measuring probe installed on a tank and connected by a signal cable (max. length 100 m / 328 ft) to a signal converter
Operating conditions	
Ambient temperature	-40+80°C/ -40+176°F Integrated LCD display: -20+60°C / -5+140°F; if the ambient temperature is not in these limits, the display switches off
Storage temperature	-50+85°C/ -60+185°F (min40°C/ -40°F for devices with the integrated LCD display option)
Protection category	IP 66/67 equivalent to NEMA type 4X (housing) and type 6P (probe)
Materials	
Housing	Polyester-coated aluminium or stainless steel (1.4404 / 316L)
Cable entry	Plastic; nickel-plated brass, stainless steel
Electrical connections	
Power supply (terminals)	Terminals output - Non-Ex / Ex i: 1230 VDC; min./max. value for an output of 22 mA at the terminal
	Terminals output - Ex d: 1636 VDC; min./max. value for an output of 22 mA at the terminal
Current output load	Non-Ex / Ex i: RL [ $\Omega$ ] $\leq$ ((Uext -12 V)/22 mA). For more data, refer to Minimum power supply voltage on page 16.
	Ex d: RL [ $\Omega$ ] $\leq$ ((Uext -16 V)/22 mA). For more data, refer to Minimum power supply voltage on page 16.
Cable entry	M20 × 1.5; ½ NPT
Cable gland	Standard: none
	Options: M20×1.5 (cable diameter: 612 mm / 0.230.47); others are available on request
Signal cable - remote version	None for non-Ex devices (4-wire shielded cable of max. length 100 m / 328 ft to be supplied by the customer). Supplied with all Ex- approved devices. For more data, refer to the handbook
Cable entry capacity (terminal)	0.52.5 mm <sup>2</sup>
Input and output	
Measured variable	Time between the emitted and received signal
Current output / HART®	
Output signal	420 mA HART® or 3.820.5 mA acc. to NAMUR NE 43 1
Resolution	±3 µA
Temperature drift (analog)	Typically 50 ppm/K
Temperature drift (digital)	Max. ±15 mm for the full temperature range
Error signal options	High: 22 mA; Low: 3.6 mA acc. to NAMUR NE 43; Hold (frozen value - not available if the output agrees with NAMUR NE 43) 2
PROFIBUS PA	
Туре	PROFIBUS MDP interface that agrees with IEC 61158-2 with 31.25 kbit/s; voltage mode (MDP = Manchester Coded Bus Powered)
Function blocks	1 × Physical Block, 1 × Level Transducer Block, 4 × Analog Input Function Blocks
Device power supply	932 VDC - bus powered; no additional power supply required
Polarity sensitivity	No
Basic current	15 mA

# DR2000 - TDR level meter

### **PROBE OPTIONS**

	Double cable 2× Ø4 mm / 0.16 <sup>°°</sup>	Double rod 2 × Ø8 mm / 0.31"	Coaxial Ø22 mm / 0.9 <sup>°°</sup>
Measuring system			
Application	Liquids		
Measuring range	140 m / 3.3131 ft         14 m / 3.313.1 ft         16 m / 3.319.7 ft		16 m / 3.319.7 ft
Dead zone	This depends on the type of probe. For n	nore data, refer to Measurement limits on	page 19.
Measuring accuracy			
Accuracy (in direct mode)	Standard: $\pm 10 \text{ mm} / \pm 0.4^{\circ}$ , when distance $\leq 10 \text{ m} / \pm 0.1\%$ of measured distance, when distance is the distance		
	Optional: $\pm 3 \text{ mm}/ \pm 0.1^{\circ}$ , when distance $\leq 10 \text{ m}/3 \pm 0.03\%$ of measured distance, when distance, when distance is the stance of the stance is t		
Accuracy (in TBF mode)	±20 mm / ±0.8 <sup>"</sup>		
Resolution	1 mm/ 0.04"		
Repeatability	±1 mm/ ±0.04"		
Maximum rate of change at 4 mA	10 m/min / 32.8 ft/min		
Operating conditions			
Min./Max. temperature at the process connection (also depends on the temperature limits of the gasket material. Refer to "Materials" in this table.)	-50+150°C/ -58+302°F		
Pressure	-140 barg / -14.5580 psig		
Viscosity (liquids only)	10000 mPa.s / 10000 cP	1500 mPa.s / 1500 cP	500 mPa.s / 500 cP
Dielectric constant	$\geq$ 1.6 in direct mode	·	$\geq$ 1.4 in direct mode
	$\geq$ 1.1 in TBF mode		
Materials			
Probe	Stainless steel	Stainless steel (1.4401 / 316); Hastelloy	® C-22 (2.4602)
	(1.4404 / 316L)		
Gasket (process seal)	FKM/FPM (-40+150°C/ -40+302°F) 1	; Kalrez® 6375 (-20+150°C/ -4+302	°F); EPDM (-50+150°C / -58+302°F)

### **DIMENSIONS AND WEIGHTS**

Housing dimensions

- **1** Housing options. From left to right: compact converter with horizontal housing, compact converter with vertical housing, and remote converter (top) and probe housing (bottom).
- 2 Process connection options. From left to right: threaded connection for Ø2 mm / 0.08" single cable probe, flange connection for Ø2 mm / 0.08" single cable probe, high-temperature (HT) threaded connection for Ø2 mm / 0.08" single cable probe, HT flange connection for Ø2 mm / 0.08" single cable probe, flange connection for other probes, threaded connection for other probes.
- **3** Probe options. From left to right: Ø2 mm / 0.08<sup>°</sup> single cable probe, Ø4 mm / 0.16<sup>°</sup> single cable probe, single rod (single-piece or segmented) probe, double rod probe, Ø4 mm / 0.16<sup>°</sup> double cable probe and coaxial (single-piece or segmented) probe.

All housing covers have bayonet connectors unless it is an explosion-proof (XP / Ex d-approved) device. The terminal compartment cover for explosion-proof devices has a thread with a flame path.

## DR2000 - TDR level meter

### **MODEL NUMBERING - CONTINUED**

- 1 Only for the "4...20 mA passive HART" output option
- 2 For more data, refer to the Technical data section (Approvals and certification)
- 3 DIP= Dust Ignition Proof
- 4 For Ø2 mm / 0.08" single cable probes only
- 5 Do not use with double rod and double cable probes
- 6 Other flange faces are available. Refer to your local supplier for more data.
- 7 Do not use with double rod, double cable and coaxial probes
- 8 Flanges with RF faces have a slip on-type design with an anti-blowout feature. Other flange faces are available. Refer to your local sup- plier for more data.
- 9 For liquids only
- 10 For liquids only and not for the coaxial probe. Calibration points for this option are given by the customer.
